## WORK EXPERIENCES

### ➤ **SOFTWARE DEVELOPER** – All In One Inc (2022-Present)

#### Key Responsibilities

- Developed and maintained the front-end of web applications using HTML, CSS, Bootstrap, JavaScript, jQuery, and AJAX to ensure responsive and user-friendly interfaces.
- Designed and implemented back-end logic using PHP and MySQL, handling server-side scripting and database integration for dynamic functionality.
- Managed and optimized company databases, including data structure design, indexing, and query performance improvements.
- Developed custom information systems for clients, focusing on automating and improving their business processes and workflows.
- Integrated and maintained API connections using SOAP(XML) and REST(JSON), ensuring smooth data communication between FrontEnd and BackEnd development.
- Conducted testing and debugging of projects to ensure functionality, compatibility, and quality before deployment.
- Created and proposed UI/UX designs and layouts for front-end development to improve user experience and visual appeal.
- Presented completed projects and system demonstrations directly to clients for review and approval.
- Provided technical support and maintenance for deployed projects, addressing issues and implementing enhancements.
- Resolved system bugs and issues, ensuring continuous and stable application performance.

### ➤ **SOFTWARE ENGINEER** – QBE Insurance (2021-2022)

#### Key Responsibilities

- Monitored and evaluated the performance of all company applications supported by the team to ensure optimal functionality and reliability.
- Modified and enhanced existing applications using Java to fix bugs, adapt to new hardware, and improve overall system performance.
- Investigated and assisted in resolving issues raised by users, ensuring timely and effective solutions.
- Fixed and deployed application issues and updates using SourceTree and Jenkins, following proper version control and deployment processes.

- Prepared and maintained documentation such as Impact Analysis, Technical Design, and Unit Test Results for every fix and enhancement made to the applications.
- Participated in daily Scrum meetings, providing updates on assigned tickets, progress, and any blockers encountered.

## ➤ **WEB SOFTWARE DEVELOPER** – Gattesoft Corp. (2016 – 2021)

### Key Responsibilities

- Developed and enhanced applications from scratch and maintained legacy projects using PHP, HTML, CSS, JavaScript, jQuery, and AJAX, improving process efficiency and accuracy.
- Created custom software solutions that enabled clients to make informed decisions, optimize resource use, and manage risks more effectively.
- Reviewed and evaluated code for efficiency, debugging, and overall quality assurance.
- Designed and implemented front-end components using Bootstrap, HTML, CSS, AJAX, JSON, JavaScript, and jQuery to ensure responsive and user-friendly interfaces.
- Developed and managed databases using PHP and MySQL, including data structure design, query optimization, and integration with web applications.
- Led a team of programmers, reviewing their code and test plans to ensure quality, efficiency, and adherence to project standards.
- Developed Web Service APIs for integration with third-party client systems, ensuring secure and reliable data exchange.
- Connect my projects such as Clinic Management System and Hotel Management System in third-party system using REST & SOAP APIs.

## CERTIFICATIONS

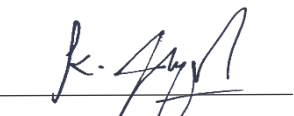

- PHP Fullstack Developer
- Web Development Fullstack

## EDUCATION

- **Bachelor of Science in Computer Science**  
Pamantasan ng Lungsod ng Muntinlupa
